

## **TOR for Market Research for e-GP**

### **Back Ground**

The Royal Government of Bhutan has embark on the electronic Government Procurement (e-GP) to promote transparency, efficiency and value for money during the government procurement. The e-GP system shall serve as a primary source of information on all Government procurement and support through e-tendering and e-purchasing among others. Moving on line is expected to benefit government through efficiency gains and cost savings, the suppliers through easy and equitable access to information and opportunity for participation and public at large through enhanced transparency and accountability.

### **The Objectives of the Market Research**

The Objective of the market research is to find out the market scenario on the e-procurement/e-tendering solution providers from the national bidders(Joint Venture / Consortium). However, this is not to award the work. The interested and potential bidders can provide information on any of the system

1. Public Private Partnership Model,
2. Off the Shelf Package
3. Development of system from scratch
4. Others

Bidders are further required to submit the proposal and make a presentation (30 mins) on following areas, but not limited to:

- Background of company
- Background on similar work experience if exist
- List the functionalities
- System language and database
- Authentication and Security features
- Number of clients using the system if exist
- Demonstration of system

- Type of business modality
- Time and cost (if applicable) for information
- Any additional information
